

Gambling

Is a game of chance by taking a risk to bet or wager money/items in the hopes of winning more money or possessions of greater value.

Problem Gambling

Problem gambling is defined as gambling that causes harm to the gamblers or someone else in spite of a desire to stop. They feel the constant need to gamble, hide their losses, dismiss the concerns of family or friends, play again to regain the money they have lost, and win more.

If you or someone you know is struggling with issues of gambling, **We Can Help!**

At MAHA, we offer gambling screening, mental health counseling, and other resources to assist those struggling with gambling issues
